OFFICE OF GENERAL SUPERINTENDENT OF TRANSPORTATION

April 13, 1953

TO ALL BUS OPERATORS:-

Effective April 15th all Bus Operators (Gasoline, Diesel & Propane Buses) who have a fallback of 5-minutes or over, will shut off motors at terminals.

In order to conserve fuel and damage to equipment, it is very important that all motors be shut off at terminals while on lay-over or meal fall-back. Also be certain that transmission is in neutral position if you leave bus.

Conservation of fuel is an important item in the expense of operation, and your co-operation in saving fuel will be appreciated.

Frequent checks will be made to see that this practice is observed.
