SPECIAL NOTES

1. The normal position of the rigid switches on the east lead is for movement over the east lead.
2. The normal position of the spring and stay switches at the diamond crossover on the east and west lead is for movement over the lead tracks.
3. The normal position of the rigid switches on tracks 41 through 47 is for movement over the north lead.
4. All switches, except the four spring and stay switches at the diamond crossover, are rigid switches.
5. All train movements on the incline track are governed by interlocking home signals.
6. The freight engine can only be switched from the east lead to the west lead at the diamond crossover near track 17.

RULE 227. SPEED IN YARDS

- (a) The speed of trains within Yard Limits must not exceed six (6) miles per hour.
- (b) Yard Foremen, Switchmen and Motormen operating trains on any tracks within Yard Limits must use no more than one (1) point of power and be prepared to stop immediately.
