AUGUST 1964 NO. 651

ISSUED BY THE GLOBE TICKET COMPANY IN THE INTEREST
OF THE TRANSIT INDUSTRY

PARKING

an integral part of Transit

We quote from our January 1962 Globe Trotter issue, No. 621: "In any consideration of express, meaning rapid transit operation, may this be by subway, elevated, monorail if you wish, ditch, expressway reserved strip or even expressway bus, we believe that an integral part of planning should cover adequate provision for the storing, essentially during the day, of automobiles at feed-in points for the rapid system."

PARKING is becoming an increasingly important factor in all considerations of modern, speeded up transit service into city areas. Consequently more and more modern transit companies concern themselves with problems of encouraging, supporting or operating parking facilities at locations where they serve to feed into the transit system.

We feel, therefore, that we can be of some help, if we devote a series of several issues of our Globe Trotter once again to the subject of AUTOMATED PARKING FACILITIES.

This first issue of the series gives an over-all glance of modern equipment available for automated parking.

GLOBE TICKET COMPANY

112 N. 12th STREET, PHILADELPHIA, PA. 19107

A Nation-Wide Service

WHAT IS "Parkontrol"® ??

A system of scientifically engineered equipment, built by leading manufacturers, coupled with the finest tickets and printed controls, applied to your Parking problem by specialists, with experience and know how.

UNION SWITCH AND SIGNAL

UNIVERSAL CONTROLS

RAPIDPRINT CO.

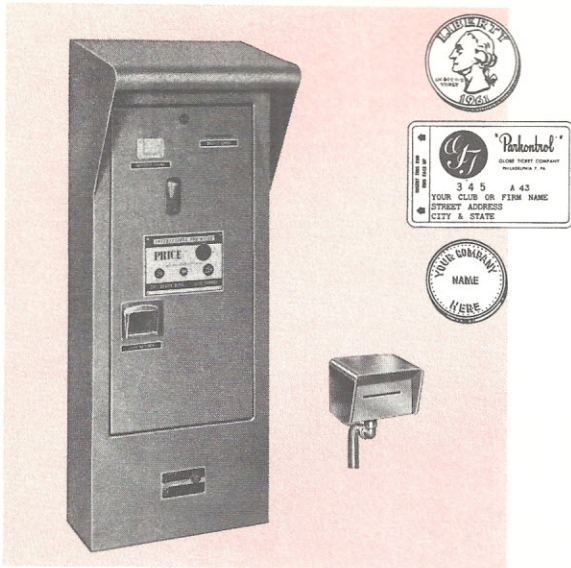

CROUSE HINDS CO.
