Service bulletin

TO: All Concerned, Rail

SUBJECT: Third Rail Installation, South Boulevard
Storage Track, Evanston Route

EFFECTIVE: Thursday, December 10, 1981-1000 Hours

Effective on the above date and time, newly installed third rail will be put into service. Overhead trolley wire has been removed.

The power for the east track is controlled by a knife switch located approximately 50 feet south of the south end of the South Boulevard Station platform.

The power for the west track is controlled by a knife switch located adjacent to the spring-and-stay switch, which leads from the west track to the east track.

M. Lovelle
Director, Service

J.R. Blad
