CHICAGO NORTH SHORE AND MILWAUKEE RAILWAY

September 17, 1954

MEMORANDUM

SUBJECT: Side Track Agreements

There are four situations in which an agreement must be made between the Railway and an industry locating on our lines and wishing to be served.

Situation 1: Industry located on property which it owns desires siding on its property and connection to Railway.

Situation 2: Industry located on property leased from Railway desires siding on leased property and connection to Railway.

Situation 3: Industry located on property which it owns desires to use siding on adjoining Railway property.

Situation 4: Industry located on property leased from Railway desires to use siding on adjoining Railway property.

The standard side track agreement is designed to include all the provisions and terms under which an industry siding is built, maintained and used and are:

- (1) RIGHT-OF-WAY: who provides it.
- (2) CONSTRUCTION: who performs the construction and who pays the cost of each geographical section.
- (3) MAINTENANCE: who performs the maintenance and who pays the cost of maintenance of each geographical section.
- (4) OWNERSHIP: who owns each geographical section.
- (5) USE: reserves to Railway the right to use industry-owned siding for other Railway purposes or to reach and serve other neighboring industries.
- (6) CHANGES OR ENLARGEMENT: protects Railway from cost of changes in grade or location or alignment and also against any loss or damage to industry from complete elimination of siding.

- (7) **CLEARANCES:** requires industry to exercise care and to preserve clearances.
- (8) **LIABILITY:** requires industry to assume liability for losses by fire and for loss, damage or injury from act or omission of industry.
- (9) **DISCONTINUANCE:** industry assumed all loss or damage because of necessary discontinuance of siding.
- (10) **CANCELLATION, TERMINATION AND REMOVAL:** provides terms under which these actions can be taken.

-X-

In my opinion, the circumstances under which a side track agreement is or is not required are as follows:

Situation 1: In this case the standard side track agreement includes all the provisions and terms to be covered and must be executed. This will usually be the only agreement in such a case.

Situation 2: In this case, while a lease agreement must be executed to cover the lease of the property, all provisions and terms contained in the standard side track agreement must also be covered and a side track agreement should be executed in addition to the lease.

Situation 3: In this case, the industry will neither own nor maintain the siding and hence Paragraphs 1, 2, 3, 4 and 10 of the standard side track agreement are not pertinent and Paragraph 6 may not be. The provisions of Paragraphs 5, 7, 8 (at least second paragraph and perhaps first paragraph also) and 9 of the standard side track agreement must, however, be covered and the standard side track agreement form might be used to cover these pertinent points, scratching out those not pertinent. However, the industry probably will want some guarantee or assurance of its continuing right to use the siding for its purposes and if a separate agreement to this effect is made, the pertinent points could then be included in this separate agreement rather than by the use of a side track agreement.

Situation 4: This situation is similar to Situation 3 as to requirements but, since a lease agreement must be concluded, all pertinent requirements can be included in the lease agreement and no separate side track agreement would be needed.

Situations 3 and 4 are similar to the use of a public team track which we permit a shipper to use without an agreement of any sort. This is done not because it would not be desirable to have an agreement covering at least clearances and liability but because it is not feasible to get such an agreement from an intermittent user.

In situation 4 the industry will need a lease and in both Situations 3 and 4 the industry as a permanent shipper will want some assurance of priority and continued right to use the Railway-owned siding. These requirements or wants of the industry thus give the Railway an opportunity to obtain the former's agreement to the points the Railway wants covered.

This Agreement, Made this \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_ by and between  
CHICAGO NORTH SHORE AND MILWAUKEE RAILWAY COMPANY, hereinafter called the "Railway", and

hereinafter called the "Industry", Witnesseth:

WHEREAS, the Industry desires track facilities, hereinafter called "side track" (by "side track" meaning and intending in this agreement, unless otherwise limited, to include all necessary grading, ballast, ties, rails, rail fastenings, special work, crossings, bumping posts, bridges, bonds, trolley poles, trolley supports, trolley wire cutout switches, wires, cables, electrical and signal appliances and appurtenances), for the economical and convenient conduct of the business of the Industry, at or near

in the County of \_\_\_\_\_  
described as follows:

State of \_\_\_\_\_

in accordance with plan numbered \_\_\_\_\_, dated \_\_\_\_\_,  
hereto attached and made a part hereof: \_\_\_\_\_, designated as EXHIBIT

NOW, THEREFORE, in consideration of the covenants and agreements herein contained, it is mutually agreed that the said side track shall be constructed and maintained, and the Railway hereby agrees to operate the same, under the following terms and conditions:

#### 1. RIGHT-OF-WAY

The Industry shall provide, without cost to the Railway, all necessary right-of-way outside of the right-of-way of the Railway, required for the proper construction and operation of said side track, said right-of-way to be satisfactory to the \_\_\_\_\_ of the Railway.

The cost and expense of procuring or complying with any ordinance, order, permit or consent whatsoever required by municipal, State or other lawfully constituted authorities for the construction, maintenance, operation and use of said side track, and all special assessments, taxes and the expense of all requirements in connection with any public improvement levied or made against, upon or on account of said side track shall be borne by the Industry.

The Railway shall have the right to enter upon the property of the Industry for the purpose of constructing, maintaining and operating said side track.

## 2. CONSTRUCTION

The cost of constructing said side track as hereinabove defined shall be borne as follows:

## 3. MAINTENANCE

Said side track shall be maintained (including removal of ice and snow) and renewed to the satisfaction of the \_\_\_\_\_ of the Railway;  
the work of maintenance shall be performed by:

and the cost of such maintenance shall be borne as follows:

The Railway shall, however, have the right at any time to make such repairs, additions, betterments and changes in the said side track, and to install, maintain and operate such derrails, signal and other safety devices (wherever located), and to employ flagmen or other employees, as in its judgment may be necessary or as may be required by competent public authority for the operation of said side track. The Industry agrees to pay to the Railway the entire cost and expense of such work.

#### 4. OWNERSHIP

The title and ownership of said side track shall be vested as follows:

#### 5. USE

The Railway shall have the right to use the whole or any part of said side track, or any extension thereof or any tracks connected therewith, for its own purposes or for reaching and serving other neighboring industries or plants, or in connection with or for business other than that of the Industry; and the Industry agrees that the Railway may, upon mutual agreement between the parties hereafter entered into, construct, maintain and operate upon lands owned or leased by the Industry extensions of and laterals to said side track for the purposes aforesaid; provided, such use of the said side track or such extensions or laterals will not materially interfere with the conduct or handling of the business of the Industry, but nothing herein contained is intended to or shall in any manner limit or restrict the use by the Railway of any main switch lead located upon land owned by the Railway.

Except as hereinabove provided, neither party hereto shall permit or authorize the use of said side track by or for the benefit of any other person, firm or corporation not one of the parties hereto, without the written consent of the other party. The Industry shall not assign this contract or any rights thereunder without the written consent of the Railway.

#### 6. CHANGES OR ENLARGEMENT

All expense consequent upon changes in the operating practices of the Railway or consequent upon any readjustment of said side track, or any portion thereof, in order to conform to any present or future changes in the grade, location, or alignment of the tracks of the Railway at said point of connection, shall be borne and paid by the Industry. The Industry will assume and bear any and all loss or damage sustained by it in consequence of any elimination of said side track due to the relocation or change in the grade of the tracks of the Railway by virtue of any municipal action or otherwise.

#### 7. CLEARANCES

The Industry shall exercise the greatest care to prevent cars delivered to it or other obstructions within its control from passing beyond and outside of the limits of the side track described herein and from approaching so close to other side tracks or to the Railway's main line tracks as to endanger safe operation thereon. The Industry shall also use the greatest care to prevent unsafe approach to or contact of any kind with electrical wires, appliances and appurtenances of the Railway.

The Industry agrees not to permit any obstruction over said side track less than \_\_\_\_\_ feet above top of rail, or alongside of said side track less than \_\_\_\_\_ feet from center of track, with the necessary additional clearance on curves, unless otherwise authorized by proper regulatory authority and approved by \_\_\_\_\_ of the Railway.

#### 8. LIABILITY

It is understood that either the presence of the Railway's electrical wires, appliances and appurtenances or the movement of railway locomotives involves some risk of fire, and the Industry assumes all responsibility for and agrees to indemnify the Railway against loss or damage to property of the Industry or to property upon its premises, regardless of Railway's negligence, arising from fire resulting from the presence of electrical wires, appliances and appurtenances of the Railway or caused by locomotives operated by the Railway on said side track or in its vicinity for the purpose of serving said Industry, except to the premises of the Railway and to rolling stock belonging to the Railway or to others and to shipments in the course of transportation.

The Industry also agrees to indemnify and hold harmless the Railway for loss, damage or injury from any act or omission of the Industry, its employees, or agents, to the person or property of the parties hereto and their employees and to the person or property of any other person or corporation, while on or about said side track; and if any claim or liability other than from fire shall arise from the joint or concurring negligence of both parties hereto, it shall be borne by them equally.

## 9. DISCONTINUANCE

Any and all loss or damage sustained by the Industry in consequence of any temporary or permanent elimination of said side track, shall be assumed by the Industry, or in event the disposition of the property of the Railway, or its future use or development shall make it impracticable in the judgment of the Industry hereby waives any and all claims therefor.

## 10. CANCELLATION, TERMINATION AND REMOVAL

It is expressly understood and agreed that if for the space of \_\_\_\_\_ consecutive months the business of the Industry be not operated, unless such non-operation is the result of strike or strikes, or if the title to said Industry becomes vested in, or the operation thereof be transferred to, some party other than the Industry, or if the Industry fails to keep and perform any of the covenants and agreements, terms or conditions hereinbefore set forth to be by it kept and performed, or if any other party operating said Industry refuses to adopt this indenture and to agree in writing to be bound thereby, then the Railway, without notice, shall be entitled to take up and remove any or all of the track or tracks owned by it as aforesaid and may go upon the premises of the Industry for that purpose and shall not be liable to account in any way to anyone for any moneys paid or expended on account of any of the tracks covered by this indenture, nor for any damages on account of the removal of the track or tracks owned by the Railway as aforesaid, and upon such removal this indenture shall terminate.

This agreement shall be binding upon the parties hereto, their successors and assigns, and unless sooner terminated, as hereinbefore provided, shall continue in force until terminated by either party giving to the other not less than thirty days' written notice. At the time named in such notice, the Railway may discontinue the use of said side track and may go upon the lands of the Industry and remove everything belonging to said side track, except such portion thereof as, by the terms of this agreement, is owned by the Industry and shall not be liable to account in any way to anyone for any money paid or expended on account of any of the track or tracks covered by this agreement nor for any damages resulting from the removal of any or all of the material owned by the Railway.

IN WITNESS WHEREOF, the parties hereto have executed this agreement in the day and year first above written.
