

EXPLANATIONS:

Route

Bus route names and numbers are generally as they appear on roller curtains.

Terminals/Destination Signs

These are taken from roller curtain sign lists.

Schedule Interlocks

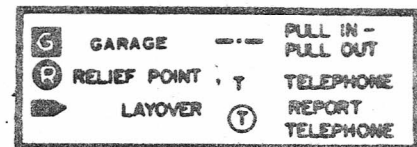

These indicate cases of runs on a given route working on another street. This edition lists by route those which have pieces of work on (to) another route or are worked by (from) another route. Most schedule interlocks are only used Monday-Friday, although a few are employed on weekends.

Hours of Operation

This information is otherwise only available by studying supervisor guides. It is generally self-explanatory. The format of presentation is flexible, reflecting the wide variations in the patterns of service on the routes themselves. Periods of short-turn operations, within the period of operation of a longer portion of a route, are not spelled out.

Maps

Maps currently issued by External Affairs are reproduced here. They are always arranged with north facing the top of the page. The standard codes for line maps are shown on the right.

Miscellaneous

Information is provided on:

- availability of public timetables (call Marilyn Hayward on extension 4051).
- special fares
- stops on limited stop routes and non-stop zones on express routes

For further information, suggestions, corrections, and changes in distribution please contact Marilyn Hayward on extension 4051.

Revisions

This book is issued in loose-leaf form to facilitate updating information on specific routes as necessary.
