Re: Description of Routes update

The most recent Description of Routes update occurred in May, 1981. Since that time, numerous service changes have been made. As a result, all sheets, including those without service changes, are being replaced. A new binder, however, will NOT be issued.

The interlock section of the Description of Routes has been changed to list, by route, those routes that have pieces of work on ("to") another route or are worked by ("from") another route.

The attached updated sheets are based on changes through June 30, 1982. Following is a list of routes which have had changes since June 30, that we are now in the process of updating and will be distributed as soon as they become available.

Over the past year many changes in staffing and organization have taken place, and we have revised our distribution list. Please inform Ms. Marilyn Hayward on extension 4051 if further changes in our mailing list should be made. The intent is to have updates go as directly as possible to those who will be using and keeping up the book. As we are now out of binders those no longer in active use should be returned.

I would like to thank Mr. Andris Kristopans, a former CTA employee for his contribution to the Description of Routes. Mr. Kristopans volunteered his services over the past year to complete the route history segment of the book.

Finally, if you would like to make any suggestions or corrections regarding this information, please feel free to call Ms. Judy Hedin, on extension 4052.
