SPECIAL NOTES

1. The normal setting of the spring and stay switch on track 8 is for a move into track 8.
2. The blue add and cut lights in the westbound station pocket should be turned "on" whenever adding or cutting takes place in that pocket.
3. The normal setting of the spring and stay switch on the loop track is for operation over the loop track.
4. Because the shop occasionally moves a train on tracks 7, 8, or 9 for test purposes, Switchmen operating on these tracks should check train clearances.
5. The direction sign is uncovered whenever the Yard Foreman wants to stop a train operating on the loop track in the reverse direction.
6. The track number markers are also train clearance markers.

RULE 227. SPEED IN YARDS

- (a) The speed of trains within Yard Limits must not exceed six (6) miles per hour.
- (b) Yard Foremen, Switchmen, and Motormen operating trains on any tracks within Yard Limits must use no more than one (1) point of power and be prepared to stop immediately.
